### Submission Guidelines

#### ThinkMED Journal of Medical Sciences - Manuscript Submission Guidelines

**Title Page:** The title page should contain a concise and informative title, the name(s) of the author(s), affiliation(s), and a contact email for the corresponding author.

**Abstract and Keywords:** The abstract should summarize the main findings and significance of the study in no more than 250 words. Below the abstract, provide 3-5 keywords that reflect the key topics of the manuscript.

**Introduction:** The introduction should provide background information, state the research question, and explain the significance of the study.

**Methods:** Describe the study design, setting, participants, data collection, and analysis methods. Ensure that any protocols used are described in detail to allow replication.

**Results:** Present the findings of the study in a clear, logical sequence. Use tables and figures to illustrate important points and ensure they are labeled correctly.

**Discussion:** Interpret the findings, compare them with relevant literature, discuss the implications for future research or clinical practice, and acknowledge any limitations of the study.

**Conclusion:** Summarize the key findings and their implications. Avoid overstating the significance of the results.

**References:** List all sources cited in the manuscript in the appropriate format (e.g., Vancouver, etc.). Ensure accuracy and completeness.

**Tables and Figures:** Provide high-quality images and ensure each table and figure is accompanied by a descriptive title and legend.

**Ethical Considerations:** If applicable, describe the ethical review the study underwent, and ensure informed consent procedures are detailed.

**Conflict of Interest Statement:** Disclose any potential conflicts of interest.

**Funding Statement:** Acknowledge any financial support received for the study.

**Author Contributions:** Detail the specific contributions of each author to the research and manuscript.

**Review Process:** Manuscripts will undergo a rigorous peer-review process, and authors should be prepared to make revisions based on reviewer feedback.
